## PROFESSIONAL SERVICES

In business today, IT security is a key enabler in maintaining a productive work environment. Its elements and methods are complex, and generally not understood, even by many experienced IT professionals. Our consultants provide the expertise you require to understand how and where cyber security fits in your organisation, determine which cyber security services and solutions you need, make sure you and your staff are properly trained to mitigate cyber security threats, and respond to a cyber security incident in the fastest and most effective way possible.

## MANAGED SERVICES

Information technology as used by businesses today is a vast and specialised domain which is constantly evolving. Securitude Cyber Solutions offers services that will enable your company to remain up-to-date, productive and secure. We provide cutting edge products and approaches, specially customised to suit your business needs. As a Managed Security Service Provider (MSSP), we offer the flexibility to support the needs of any company, be it small, medium-sized or global. Our expert consultants can take over some or all of your daily IT and security operations, providing the assurance of continual support.

## ADVANCED SOLUTIONS

Securitude Cyber Solutions prides itself in providing its clients with the best security products and services available in the world, always staying ahead of the technological curve. We are partnered with over a dozen companies, solving the full range of cyber security issues which organisations face today. The companies we represent are carefully chosen, each bringing a unique approach, and many with patented innovative solutions. We are convinced that some of these companies will change the way businesses will deal with cyber security, and we want to help you get there faster.

## YOUR PARTNERS IN CYBER SECURITY

Securitude Cyber Solutions provides customised cyber security services and products for businesses of all sizes. With innovative technology and experience gained in working with businesses, governments and financial institutions all over the world, we can help you assess your business's security situation, create a plan to make it as secure as possible, and execute it together. Our solutions fit any budget size, meeting your organisation's specific needs. We can fill gaps in your security strategy, maximise your existing efforts, or help you construct a security plan from the ground up.

### REDUCE THE RISK OF A DATA BREACH

Even one data breach can cause significant damage in terms of time, money and reputation. Our solutions can make your network and data more secure, and provide round-the-clock monitoring of intrusion attempts and availability.

### AFFORDABLE SECURITY SOLUTIONS

Security is often seen as a daunting problem and presumed to require massive resources. With our help, businesses of all sizes can afford to be protected.

### FOCUS ON WHAT'S IMPORTANT

Trying to protect everything completely all the time usually results in leaving some of your most important assets exposed. Our experts can help secure your operations, according to the priorities of your business.
